Weather and chance of precipitation at 800m					
Time					
06:00	09:00	12:00	15:00	18:00	21:00
Fog	Cloudy	Heavy Rain	Heavy Rain	Mist	Drizzle
Precipitation probability					
20%	20%	70%	70%	30%	30%

Forecast for Friday 14 Oct 2022

Weather: Low cloud, mist and fog overnight and early morning. This should lift and break to give some brighter spells for a time, during the morning. However, a band of rain, heavy at times, will arrive from the northwest, which should clear by late-afternoon. It will remain rather cloudy and misty with outbreaks of patchy light rain and drizzle at times during the evening.

Chance of cloud-free hill tops above 800m: 30% early and late in the day, 70% around the middle of the day.

Low Cloud and visibility: Extensive cloud, base 600 m, patches to 300m early and later in the day, but lifting and breaking above the tops around the middle of the day. Visibility moderate or poor in any rain and mist, occasionally very poor over the summits. Otherwise good or very good.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Some uncertainty of how quickly conditions will deteriorate through the afternoon.

Forecast for Saturday 15 Oct 2022

Weather: Showers or longer spells of rain, heavy at times, during the morning. However, it should brighten up, with the showers becoming more scattered from late-morning. The showers are likely to be heavy at times, with the risk of hail and thunder, during the afternoon and early evening. Any showers gradually easing into the evening.

Maximum wind: Southwest 30-40mph gusting 45-50mph (gale force) with a significant wind chill.

Chance of cloud-free hill tops above 800m: 80%, lowering significantly in and around showers

Low Cloud and visibility: Cloud mainly above the tops, but lowering 600m or less rain and showers. Visibility very good, falling moderate or poor in rain or showers.

Temperature: **Valleys:** Plus 6 Celsius rising to 14 Celsius
At 800m: Plus 4 Celsius
Freezing level: Above the summits
